

# **Regression and Resampling of Terrain data and the Franke function**

A. G. Eriksen

We aim to create a model to predict terrain heights through linear regression methods

## **I. INTRODUCTION**

The aims and rationales of the project. What we have done in the project. Brief summary of structure of the report

## **II. METHOD**

Theoretical models and technicalities

## **III. RESULTS**

Results of study and discussion of results

## **IV. CONCLUSION**

Beyond discussion, this is actually concluding things. perspectives of study

## **V. APPENDIX**

extra material, e.g. superfluous code, tables and figures not fitting into the text itself.
